

LED orthodontics light YS-C

ORDER CODE:T-002

Best quality materials:

Mono-fibered glass light guides for various applications.

Anodized aluminum handpiece.

Latest generation of CMS electronics.

No Vibration and noiseless operation.

Very high-quality single L.E.D.

Li-Ion battery with no memory effect.

Specifications:

Blue light intensity: 2000mW/cm²

Rechargeable Li-ion battery

Spectrum range: 420nm - 480nm

Power adapter: AC 100 - 240 V / 50 - 60 Hz

Weight Handpiece: 160g

Benefits:

Very convenient to operate.

Small size, cordless and light weighted.

No dazzling strong light which allows you to aim the light to the exact position and Improve the effectiveness of the treatment.

No Vibration and noiseless operation.

High power reachable battery.

High powerful Light intensity with a maximum reach of 2000mW/cm².

3 different working modes:

3 exposure time for optimal curing:

8s/6s/4s

You can select the correct mode according to the different types of material you wish to cure, their speed of reaction, and the clinical protocol you are following.

This high power 2000 MW LED Curing light has humanity intelligent chip, with a high intensity LED light and Li-on rechargeable battery.
